ABOUT

Frontend Software Engineer with enterprise experience building React and TypeScript interfaces for Nokia's Event-Driven Automation platform. Strong in complex UI/UX workflows, component-driven architecture, REST API integration, automated testing, and debugging across cloud-native, networking, and backend-adjacent systems.

SKILLS

Frontend: React, TypeScript, JavaScript, Vue, Angular, HTML/CSS, UI/UX, Responsive Design

Backend & APIs: Node.js, REST APIs, API Integration, Microservices, Go, gRPC, PostgreSQL

Testing & DevOps: Automated Testing, Cypress, Git, GitHub, Docker, Kubernetes, CI/CD

Systems & Networking: Linux, Networking, Wireshark, TShark, Scapy, Traffic Analysis

LANGUAGES

- English (fluent)
- French (native)
- Arabic (native)
- Spanish (limited)

PROJECTS

Yosart Gatineau Art School Website & Management Dashboard: Delivered a client-facing website and management dashboard for a Gatineau art school, supporting responsive UI, content administration, and operational workflows.

WORK EXPERIENCE

Jr. Frontend Developer (Event Driven Automation)

Nokia

Kanata, Ontario, Canada · Hybrid

2026 - Present

- Built production React and TypeScript UI for Nokia's Event-Driven Automation platform, supporting enterprise-scale data center automation workflows.
- Designed a GitLab-style Merge Request experience with reusable components, review flows, and conflict detection/resolution UI for complex configuration changes.
- Integrated frontend workflows with REST APIs and backend services to surface validation state, operational status, and conflict details in real time.
- Debug production issues, expand automated test coverage, and collaborate with UX, platform, and backend engineers across Git/GitLab workflows.

Deep Packet Inspection QA & Internal Tools (coop)

Nokia

Kanata, Ontario, Canada · Hybrid

Sep 2024 - Aug 2025

- Analyzed packet captures and application traffic on Linux with Wireshark/TShark to debug DPI classification, routing behavior, and networking issues.
- Automated packet-analysis workflows with Python and Scapy, accelerating TCP sequence/ACK investigation and reducing repetitive QA effort.
- Built and maintained frontend/backend features for Nokia internal tooling, improving usability and engineering workflows for order tracking.

Software Developer (coop)

Searidge Technologies

Ottawa, Ontario, Canada · Hybrid

Jan 2024 - Apr 2024

- Built React and D3 data visualization for airport operations, delivering a complex Gantt chart now deployed for live operations management.
- Implemented Node.js and GStreamer services for real-time H.264 to WebRTC video streaming workflows.

- Integrated frontend views with real-time operational data, supporting production airport systems at Hong Kong and JFK.

EDUCATION

BSc (Hons) Computer Science

University of Ottawa

Ottawa, Ontario, Canada

Honors: Dean's List Merit; Francophonie Scholarship Recipient

2021 - 2025
